

## Program Outline:

This program has been structured to foster the sharing of ideas on the various treatment modalities associated with soft tissue injuries and infection management with peers from across the country.

## Curriculum includes:

- The biology of wound healing
- Reconstructive principles in wound management
- Evolution of wound debridement
- Skin Substitutes/Biologics for wound healing
- Negative pressure wound therapy (NPWT) uses within orthopaedic, trauma and reconstructive

## Additional Information:

Travel and accommodations will be arranged by Smith & Nephew.

Capacity is limited to 40 participants. Registration acceptance is based upon a first come, first serve basis.

If you have any questions, please contact Michael Everette at michael.everette@smith-nephew.com or by calling 800.289.1261, ext. 3480.

September 30-October 1, 2011 – Henderson, NV
